

# CUSTOM AUTOMATED RETRIEVAL SYSTEM

This is an example of a recent Custom Automated Retrieval Steel Rack Ideal Machine built and installed for a customer. Automated material retrieval systems are safer and faster than conventional methods.

## BEFORE

## AFTER

## AUTOMATED MATERIAL RETRIEVAL

- Touch Screen PLC Controls
- No More Fork-Lift Retrieval
- Easy Access To Materials
- Increased Material Processing Speed
- Increased Shop Productivity
- Safer Material Storage & Retrieval
- Allows For More Material Storage
- Custom Sizes & Configurations Available

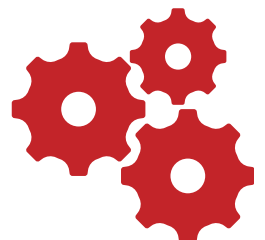

## OPERATOR-FRIENDLY FUNCTION

A Custom Automated Material Retrieval System like this one is easy to use and faster than operating a forklift.

### HOW IT WORKS:

The operator selects the desired drawer, removes material from the drawer once it is delivered, selects the next drawer of material that they want, begins processing their current material, and the automated system returns the first drawer and delivers the second.

**Easier. Safer. Faster.**
